Open the Sequence application.
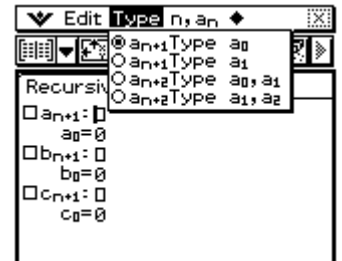

Tap **Edit, Clear All, OK**.

Note that by default, the Recursive tab is chosen rather than Explicit.

*Also note that you can create up to three different sequences at one time, a, b and c.*
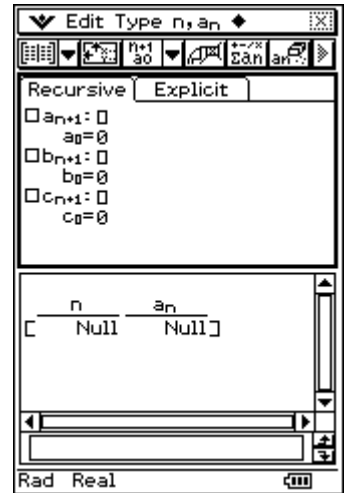

Tap **Type**.

*Note that there are 4 types of recursion available.*

Tap n, a_n.

*Note that the items available depend on the type of recursion selected.*

Tap ♦.

Tap Σdisplay.

Choose **On** to also display the sum of the terms of a sequence, or **Off** to just display the terms of the sequence.
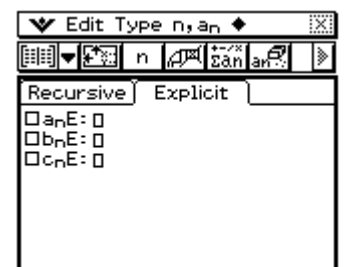

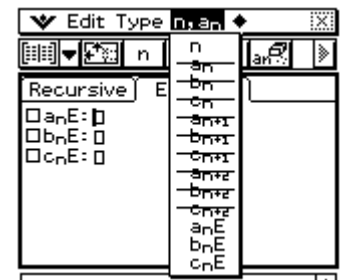

Tap on the **Explicit** tab.

Tap **Type**.

Note that no items are available from this menu.

Tap n, aₙ.

Note that only four items are available.

Tap ⊡.

Use Start and End to set the first and last terms of the sequence required and then tap **OK**.
