

Start in **Main** and tap **Edit**, **Clear All** and confirm with OK.

Tap **Edit**, **Clear All Variables** and confirm with OK.

Tap **Settings**, **Keyboard**.

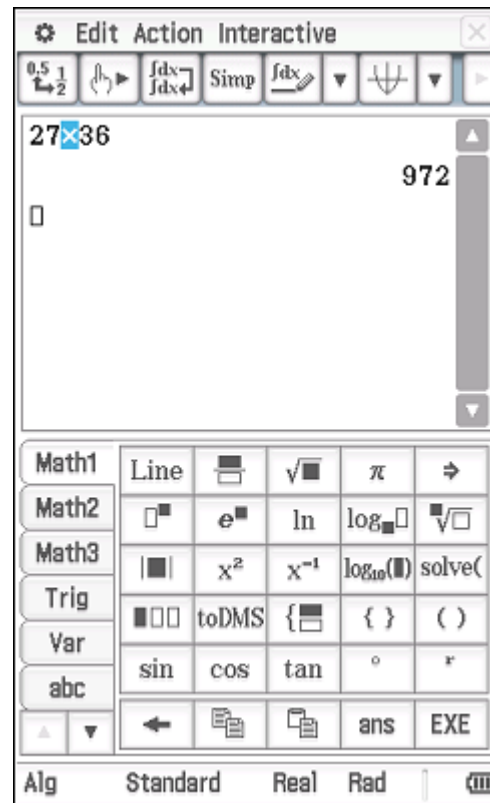

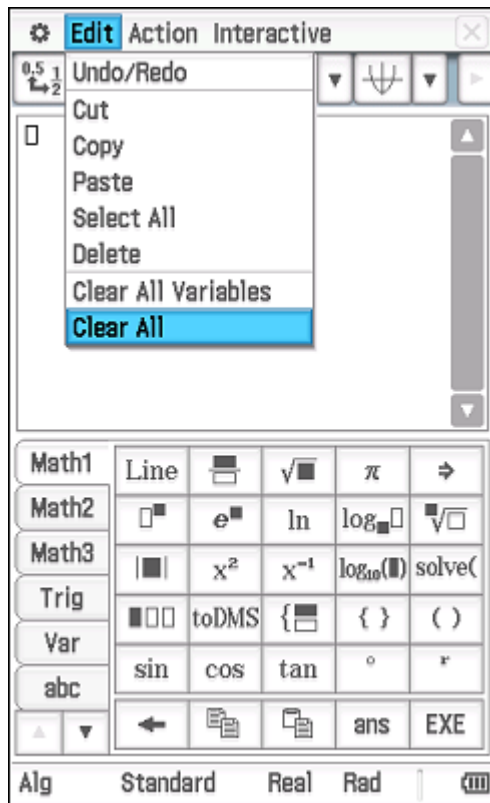

You can also press the Keyboard button on the keypad.

### Correct errors by overtyping

Type in  $27 \times 36$  and tap **EXE**.

Select the  $\times$  in the line just typed by dragging across it.

Tap  $\div$  and then tap **EXE**.

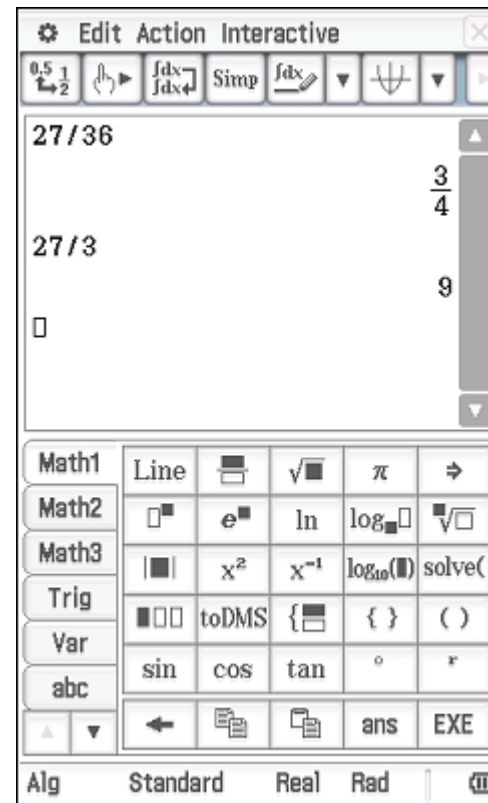

### Drag and drop selections

Select the line 27 / 36 by dragging the stylus across it from right to left.

Now drag the selection into the cursor box on the next line and let go.

Edit the calculation and tap **EXE**.

Tap on the earlier answer of  $\frac{3}{4}$  to select it and then tap on  to copy.

Tap into the empty cursor box and tap  to paste, edit the calculation and tap **EXE**.

*Note: Copy and Paste can also be found in the Edit menu.*
