

Solve systems of equations with 2 or more variables in **Main**.

Open the keyboard go to the Math1 tab.

Tap the  icon.

Tap it repeatedly to add extra rows.

Enter the system of equations to be solved.

$$x - 2y + z = 14$$

$$x - y - z = -2$$

$$2x + 3y + 4z = 28$$

Enter the three variables to be solved for (x, y and z in this example).

Tap **EXE**.

The system of equations is solved.
