

Draw a triangle

Start a new geometry file - tap **File, New** and then **OK**.

Select the triangle tool .

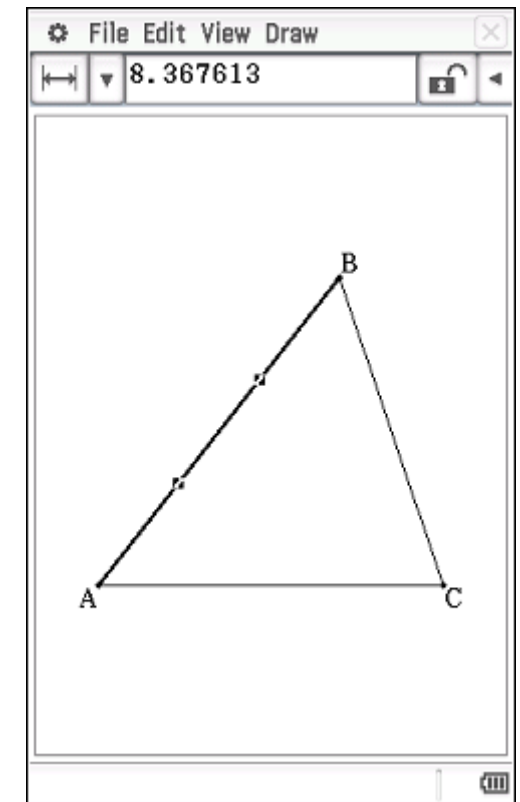

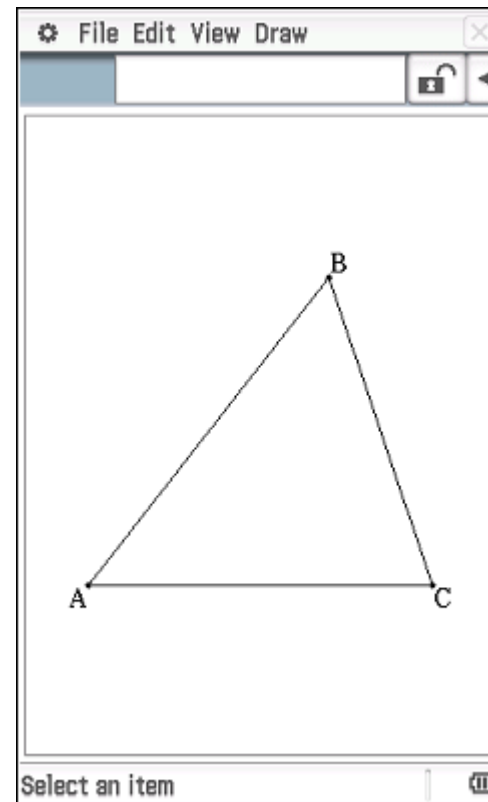

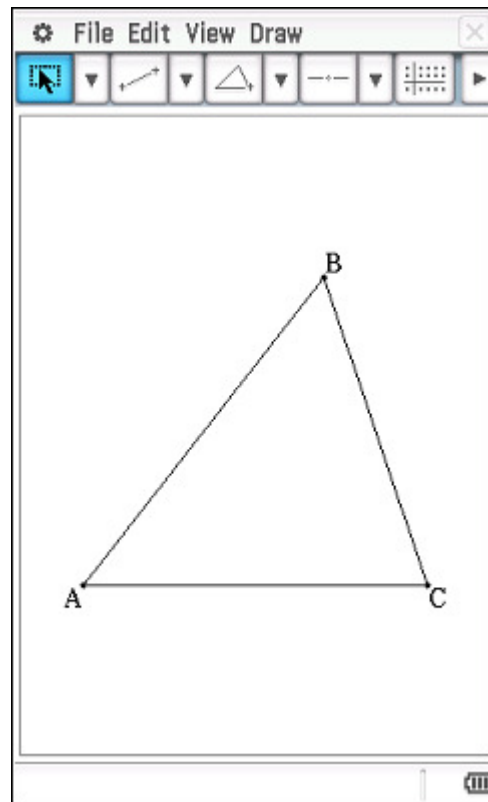

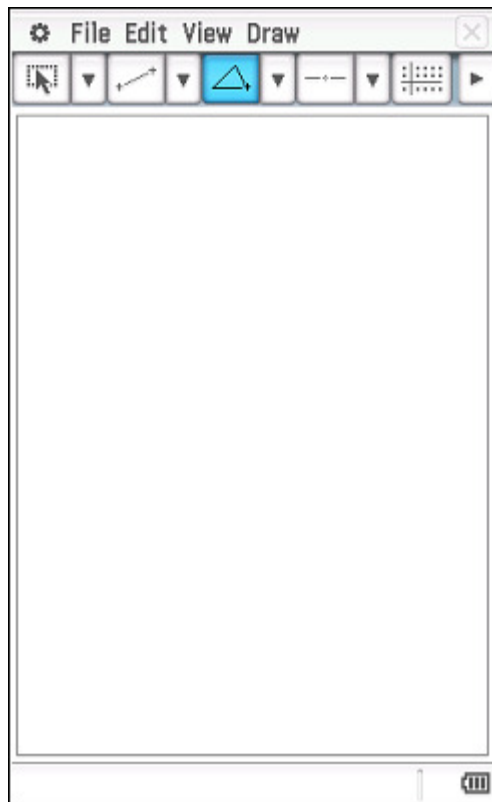

Tap once, anywhere on the screen or tap and drag the stylus to create a box and release.

Tap on the arrow  at the far right of the toolbars to display the measurement toolbar.

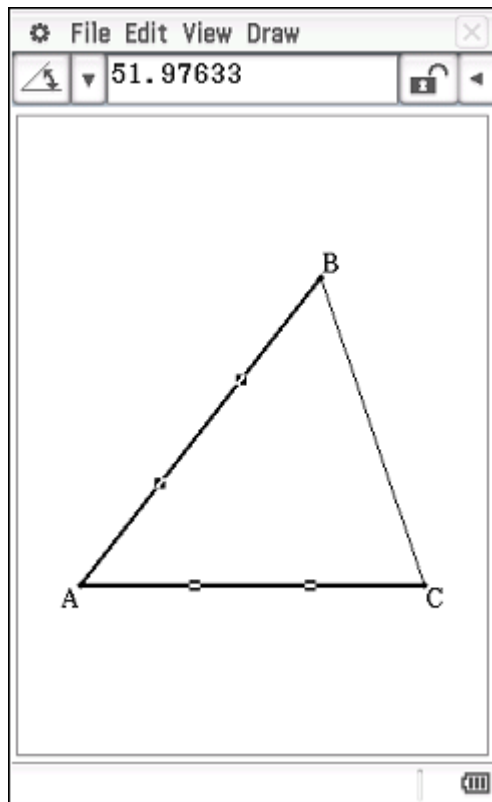

Tap on the middle of side AB.

By default, the length of this side is displayed.

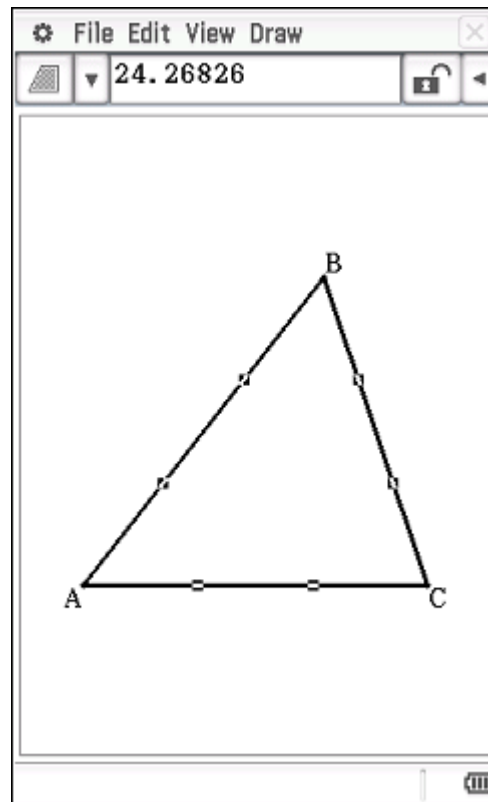

Deselect AB by tapping on a blank part of the screen, select another side, and so on.

To measure an angle, select the two sides that make the angle, one after another.

To measure the area, select all three sides.

With all three sides selected, the perimeter can also be displayed.
