

Draw a right-triangle

Start a new geometry file - tap **File, New** and then **OK**.

Select the triangle tool .

Tap once, anywhere on the screen or tap and drag the stylus to create a box and release.

Select the two sides that are to make a right angle, one after another.

Tap on the arrow  at the far right of the toolbars to display the measurement toolbar.

Tap on the measurement in the toolbar and change it to 90.

Tap EXE, or the padlock, to lock this angle as 90° .
