

Check from the application Menu the current version of your handheld ClassPad.

Check for the latest OS version for your handheld ClassPad at <http://edu.casio.com>

Download the latest version if required.

This sheet was updated June 2016, when the latest OS for handheld ClassPad was as shown below.

PC operation:

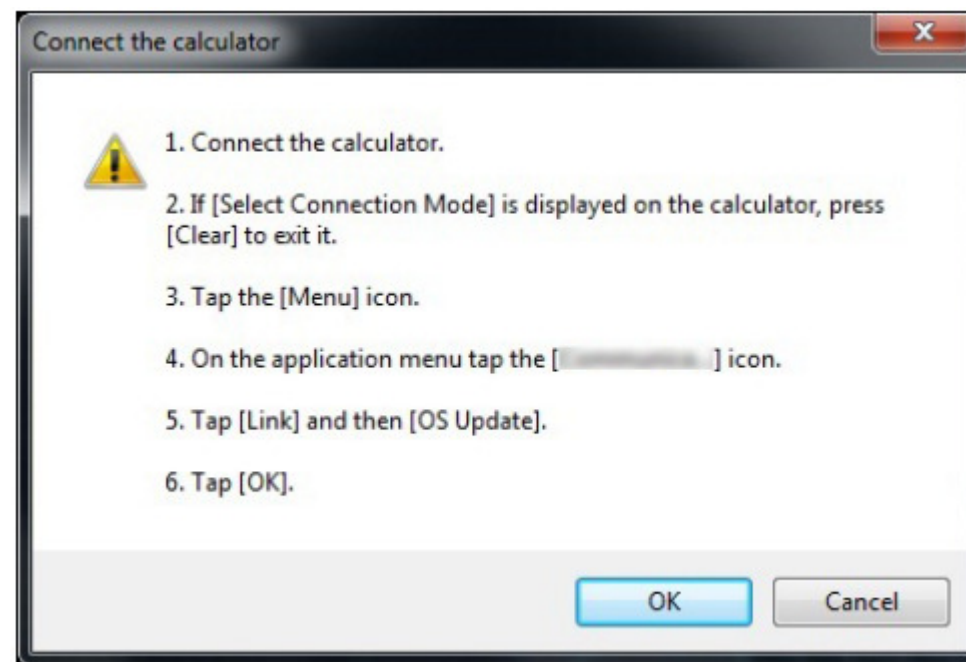

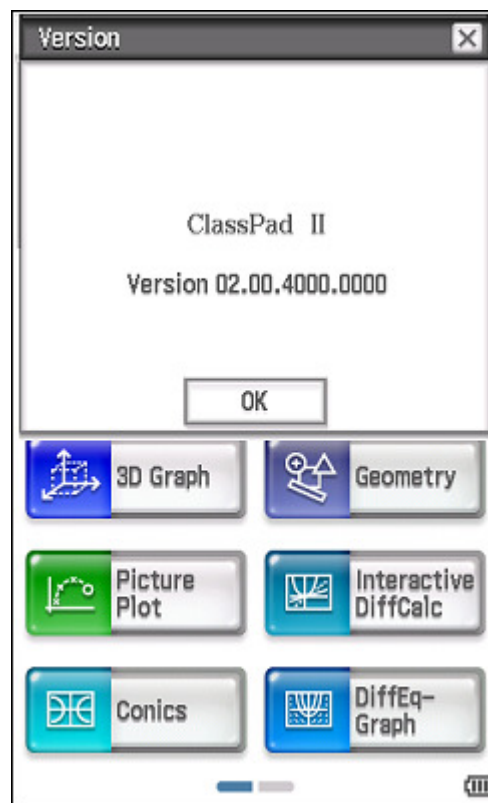

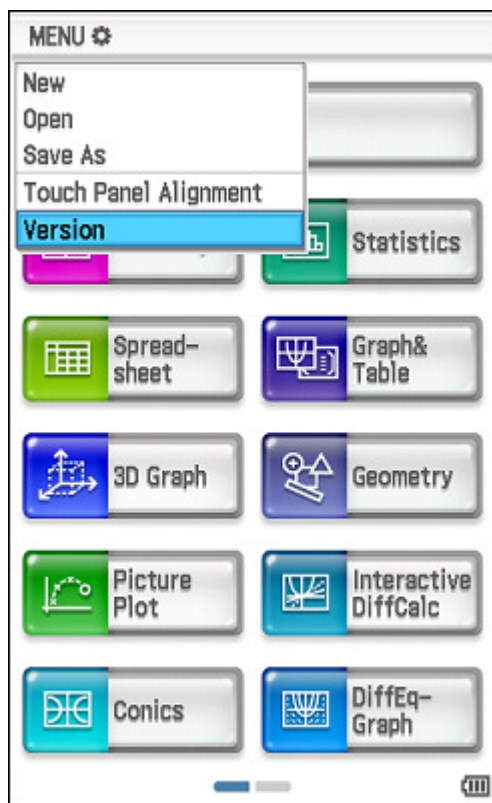

The download is a zip file. Open this zip file and copy/extract the executable updater program to a suitable location such as your desktop.

Start the update program and follow the prompts until you see the connect ClassPad screen.

Mac operation:

The download is a zip file. Open this zip file to access the program installer. Run the installer. You may need to restart your computer.

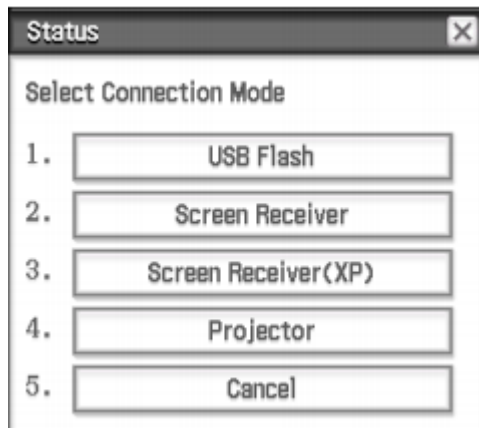

Once installed, open the Casio folder in Applications, start the updater and you'll see the screen below.

ClassPad operation:

When you connect your ClassPad to your computer using a standard USB cable, the screen below will appear on the ClassPad screen.

Press the Clear button or tap option 5, Cancel.

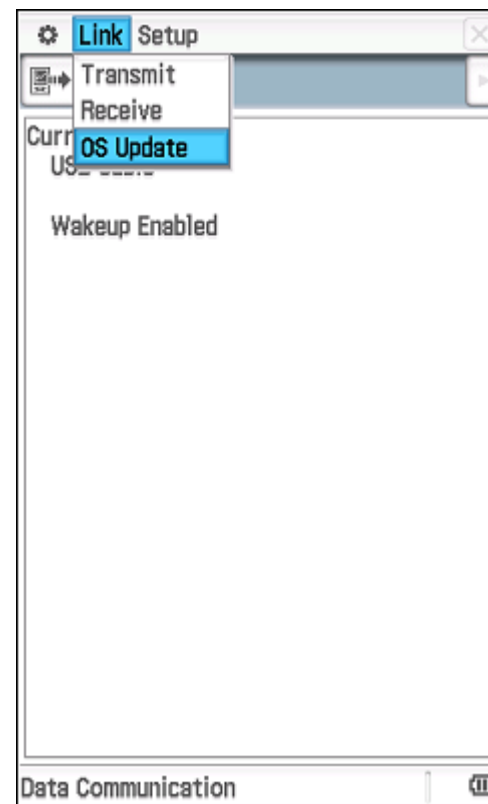

**ClassPad operation:**

Open the Communication app.

**ClassPad operation:**

Tap Link, OS Update and OK.

Now leave your ClassPad alone until the update is complete – when the screen goes blank and you are prompted to do the Touch Screen Alignment and a few other initialising procedures.

**Computer operation:**

On your computer, now wait for 10 to 20 seconds while USB drivers are installed for ClassPad before tapping the OK button to start the update process.

Then sit back and wait for several minutes while the update is completed.
